

Quiz Manager by Abdelhafid Elbekkaoui @ EPITA

### How to Use:

Once you launch the app, you will be asked to choose from a group of quizzes, some of them are open quizzes, others are MCQ. Type the number of the quiz you want to take and hit Enter!

If you choose an Open Questions Quiz. You will be given a question, you need to enter the Answer in the console to move to the next question. You will also be notified of the difficulty of each question. Once you finish the questions of a quiz you will know how much you scored.

If you choose an MCQ, you will be asked a question with 4 options to choose from. In this quiz you will type the number of the option that you think is correct as it appears on the console. As the open quiz you will go through all the questions and finally receive your score.

A feature to update the questions was not added yet, but the quiz information, questions for each quiz and answers are stored in CSV files before they're inserted into the h2 database. So you can change the quizzes simply by modifying the CSV files before launching the app.

Hope you enjoy the App !
